I'm someone who's really passionate about learning and constantly updating myself. I genuinely enjoy being part of the tech world and love exploring new tools, technologies, and ideas. I'm always excited to grow professionally.

SKILLS

JavaScript, React, HTML , CSS , C , C++ , Firebase, Tailwind, Node.js, Express.js, MongoDB

PROJECTS

Food Delivery App

- Built with Strapi, React.js, and Redux Toolkit for seamless restaurant data management.
- Enabled real-time menu updates, order handling, and user authentication.
- Used Strapi CMS for content management without redeployments.
- React.js provided responsive UI; Redux Toolkit handled complex state transitions.
- Added features like cart updates, order tracking, and user session handling.

E-commerce App

- Created product listings with search and filter capabilities.
- Displayed detailed product info with high-quality images, ratings, and specifications.
- Enabled user account management for orders, wishlists, and addresses.
- Implemented secure authentication using JWT/OAuth with password reset and 2FA.

InspireSpace - Interior Design Collaboration App

A full-stack platform combining an e-commerce showroom and an inspiration gallery for interior designers and clients.

- Users can explore high-quality design ideas and browse through categorized products such as curtains, wallpapers, carpets, lighting, and furniture.
- Interactive showroom allows users to add items to a wishlist or cart, with product filters by style, room type, material, and brand.
- Designers and admins can upload and tag design inspirations, link products to real items, and manage collections via a dedicated dashboard.
- Supports high-res media upload (Cloudinary), task/project tracking for renovation phases, and custom floor plan sharing.

WORK EXPERIENCE

Instant Creation

(10/2023 - 03/2025)

Frontend Developer

- Developed responsive interfaces using React.js, Tailwind CSS, and Redux Toolkit.
- Worked on full-stack features using Node.js, Express, and MongoDB for internal tools.
- Built and deployed reusable components for multiple client projects.
- Integrated third-party APIs and analytics tools to enhance marketing websites.
- Participated in Agile sprints, code reviews, and handled deployments via Vercel.

EDUCATION

King's College , Jalna

(06/2020 - 10/2023)

BBA - Bachelors in Business administration
