I'm someone who's really passionate about learning and constantly updating myself. I genuinely enjoy being part of the tech world and love exploring new tools, technologies, and ideas. I'm always excited to grow professionally.

## SKILLS

JavaScript, React, HTML, CSS, C, C++, Firebase, Tailwind, Node.js, Express.js, MongoDB, TypeScript, MySQL, Prisma ORM, Vue.js, Vercel, Render, Multer

## PROJECTS

### Charging-Station-App

- Created a full-stack platform for onboarding and managing EV charging stations with real-time map integration
- Built secure login and role-based admin access using Node.js, Express, JWT, and MongoDB
- Used Leaflet and OpenStreetMap to display charger locations dynamically on an interactive map
- Developed the frontend in Vue.js with Pinia for state management and modular dashboard features
- Deployed backend via Render and frontend via Vercel, with real-time updates using MongoDB Atlas

### InspireSpace - Interior Design App

- Built a full-stack app for managing interior design products like wallpapers, carpets, and domes with admin and customer roles
- Implemented secure JWT-based authentication with role-based access control using Node.js, Express, and MySQL
- Used Prisma ORM to manage relational data and built REST APIs for product, user, and order operations
- Developed a clean, responsive frontend with React and TailwindCSS, using a custom pastel palette

### Pastel Bites - Food Delivery App

- Built a responsive food ordering platform using React and Redux, with mobile-optimized UI and smooth animations
- Integrated Firebase for real-time order tracking and Firestore for storing user profiles and order history
- Implemented user authentication with secure login/signup flows, and managed state globally using Redux
- Fetched dynamic restaurant and product data from a custom Strapi CMS backend
- Features include live order updates, cart management, and persistent user sessions

## WORK EXPERIENCE

### Instant Creation

(10/2023 - 03/2025)

Frontend Developer

- Developed responsive interfaces using React.js, Tailwind CSS, and Redux Toolkit.
- Worked on full-stack features using Node.js, Express, and MongoDB for internal tools.
- Built and deployed reusable components for multiple client projects.
- Integrated third-party APIs and analytics tools to enhance marketing websites.
- Participated in Agile sprints, code reviews, and handled deployments via Vercel.

## EDUCATION

### King's College, Jalna

(06/2020 - 10/2023)

BBA - Bachelors in Business administration
